

2025 Annual Sustainability Report

Greenfield Corporation

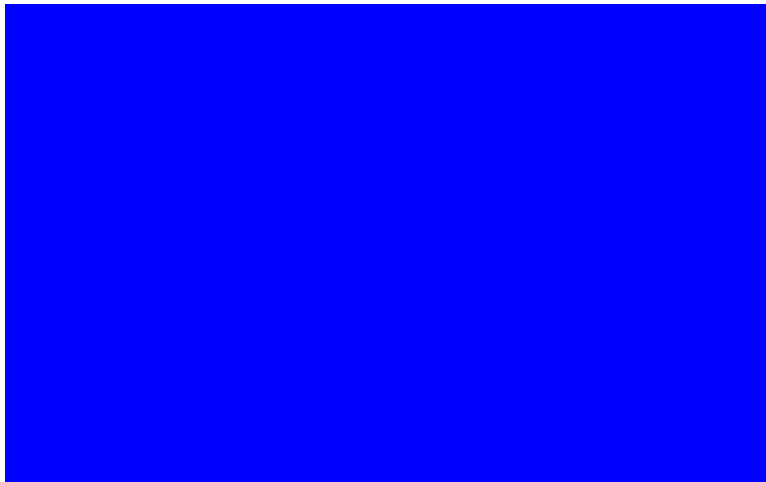

Executive Summary

This report presents Greenfield Corporation's sustainability initiatives, environmental impact metrics, and future commitments for the fiscal year 2025. Our organization has made significant strides in reducing carbon emissions, improving energy efficiency, and promoting sustainable practices across all departments and facilities worldwide.

Key achievements this year include a 25% reduction in greenhouse gas emissions, implementation of renewable energy sources at 60% of our facilities, and the launch of our comprehensive waste reduction program that has diverted over 10,000 tons of materials from landfills.

Report Highlights

- Carbon emissions reduced by 25% year-over-year
- Renewable energy adoption increased to 60%
- Water consumption reduced by 18%
- Employee sustainability training completed by 95% of staff
- Zero-waste certification achieved at 12 facilities

Environmental Impact Metrics

Carbon Footprint Analysis

Our comprehensive carbon footprint analysis covers Scope 1, 2, and 3 emissions across all operations. The following table summarizes our emissions data for the past three years, demonstrating our consistent progress toward carbon neutrality.

Category	2023	2024	2025	Change
Scope 1 (Direct)	45,000 tCO2e	38,000 tCO2e	32,000 tCO2e	-29%
Scope 2 (Indirect)	120,000 tCO2e	95,000 tCO2e	72,000 tCO2e	-40%
Scope 3 (Value Chain)	280,000 tCO2e	265,000 tCO2e	245,000 tCO2e	-12%
Total Emissions	445,000 tCO2e	398,000 tCO2e	349,000 tCO2e	-22%

Energy Consumption Trends

Figure 1: Energy consumption by source (2023-2025)

The transition to renewable energy sources has been a cornerstone of our sustainability strategy. Solar installations now provide 35% of our electricity needs, with wind power contributing an additional 25%. We expect to achieve 80% renewable energy by 2027.

Water Conservation

Water Usage Reduction Initiatives

Water stewardship remains a critical focus area for our operations. Through innovative recycling systems and process improvements, we have significantly reduced our freshwater consumption while maintaining production levels.

Facility Type	Water Usage (ML)	Recycled (%)	Target
Manufacturing	2,450	65%	75%
Office Buildings	180	40%	50%
Distribution Centers	320	55%	70%
Research Labs	95	80%	85%

Waste Management

Zero Waste Program Results

Our zero-waste initiative has transformed how we handle materials across the supply chain. Key achievements include elimination of single-use plastics in all cafeterias, implementation of comprehensive recycling programs, and partnerships with local composting facilities.

Waste Diversion by Category

- Paper and cardboard: 98% recycled
- Plastics: 75% recycled, 15% converted to energy
- Organic waste: 100% composted
- Electronics: 100% responsibly recycled

- Hazardous materials: Properly disposed through certified handlers

Social Responsibility

Community Engagement

Greenfield Corporation is committed to being a responsible corporate citizen. Our community programs focus on education, environmental awareness, and supporting local initiatives that align with our sustainability mission.

Employee Wellness Programs

We believe that sustainability begins with our people. Our comprehensive wellness programs include mental health support, fitness facilities, and flexible work arrangements that reduce commuting-related emissions.

Training and Development

All employees complete annual sustainability training covering environmental best practices, waste reduction techniques, and energy conservation measures. Leadership programs include specialized modules on sustainable business practices.

Looking Ahead

2026 Targets and Commitments

- 1 Achieve carbon neutrality in Scope 1 and 2 emissions
- 2 Increase renewable energy to 80% of total consumption
- 3 Reduce water usage by an additional 15%
- 4 Achieve zero-waste certification at all major facilities
- 5 Launch supplier sustainability assessment program

6 Expand community investment by 25%
